

Q1

Printeven.py

```
1 #Program to illustrate the pass construct
2
3 numbers = [ 1, 2, 4, 3, 6, 5, 7, 10, 9 ]
4
5 #Check for each number that belongs to the list
6 for i in numbers:
7
8     #check if the number is odd
9     if(i%2!=0):
10
11         #if odd, then pass ( No operation )
12         pass
13         #print the even numbers
14     else:
15         print(i)
16
```
